The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to the amendment filed September 30, 2004.		
2. The allowed claim(s) is/are <u>1 and 21-38</u> .		
3. 🗵 The drawings filed on <u>02 July 2003</u> are accepted by the Examiner.		
 4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a)

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Add the word "claim" before the number for each claim 1 and 21-38.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art Williams fails to teach insulating material having fibers entirely sealed over said inner surface by a sealing agent and Farr fails to teach a substantially non-fibrous, resilient cladding layer shaped to the component to be insulated and directly adhered to the insulation layer at the outer surface thereof. Furthermore, there is no suggestion or motivation to one of ordinary skill in the art to modify the reference teachings. Specifically, there is no need to add a cladding layer, as taught in Williams to the

Art Unit: 1772

insulation material of Farr, since the cladding layer provides support to a fibrous insulation medium, but such support is not needed since Farr expressly teaches a self supporting fibrous insulation medium. Farr actually teaches away from adding a cladding layer because Farr requires that the insulation be readily modifiable, by cutting, and cutting of the insulation would be greatly inhibited by the addition of a cladding layer, especially if, as expressly taught in Farr, the insulation is to be cut with a knife.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P Bruenjes whose telephone number is 571-272-1489. The examiner can normally be reached on Monday thru Friday from 8:00am-4:30pm.

unsuccessful, the examiner's supervisor, Harold Pyon can be
